

# VFI-251 Polyurea Hybrid Coating

**A breakthrough coating applied with an airless sprayer!**

- A white, aliphatic, two-component, batch mix elastomer.
- Apply with a variety of techniques.
- Easy as single component products to use.

***Better physical properties than most other polyurea hybrids.***

### ***An additional benefit!***

Your questions will be answered by one of our chemists or technicians. They're just a toll free phone call away.

***An Industry Leader in Polyurea Hybrid Elastomer Coatings.***

# ***VFI-251 is a breakthrough polyurea hybrid coating that can be applied with an airless sprayer!***

- Highly reflective white aliphatic, batch mix elastomer
- Easy to handle as a single component product
- Better physicals than most other polyurea hybrids
- Excellent adhesion and very low water permeability
- Long pot life, rapid cure, long second pass window
- Medium viscosity, thick buildups possible in one coat
- Resists chalking, cracking and embrittlement
- Flexible at low temperatures and good abrasion resistance
- Long-term color stability, available in flat or semi-gloss
- Apply to metal, wood, concrete, spray polyurethane foam, smooth asphalt roofs and more
- For use on surfaces with positive drainage
- Apply with a variety of techniques...including an *airless* sprayer

## **Some of the many uses for VFI-251 are:**

A UV stable, weather resistant finish coating over aromatic basecoats / a flat, multipurpose flexible finish coating / a single-system elastomer over existing roofing systems
